The screenshot shows the ESCO website interface. At the top, there is the European Commission logo and the ESCO title: "European Skills/Competences, qualifications and Occupations". Below this is a navigation bar with "ABOUT ESCO", "CLASSIFICATION", "TOOLS & RESOURCES", and "FORUM". A breadcrumb trail reads "European Commission > ESCO > Occupations". The main content area features a search bar, a language selector set to "English (en)", and a large yellow header for "Occupations". Below the header, it states "2942 occupations" and provides a brief description of the occupations pillar as one of the three pillars of ESCO, organized hierarchically. It also mentions that each occupation concept contains preferred and non-preferred terms, and that each occupation has an occupational profile.

The occupations pillar is one of the three pillars of ESCO. It organises the occupation concepts in ESCO. It uses hierarchical relationships between them, metadata as well as mappings to the International Standard Classification of Occupations (ISCO) in order to structure the occupations.

Each occupation concept contains one preferred term and any number of non-preferred terms and hidden terms in each of the ESCO languages.

Each occupation also comes with an occupational profile. The profiles contain an explanation of the

Not all ESCO skills can be accessed through the existing hierarchy.

The ESCO skills pillar distinguishes between i) skill/competence concepts and ii) knowledge concepts by indicating the skill type. There is however no distinction between skills and competences. Each of these concepts comes with one preferred term and any number of non-preferred terms and hidden terms in each of the ESCO languages. It also includes an explanation of the concept in the form of description, scope note and definition. The skills pillar of ESCO does not contain a full hierarchical structure but is structured in four different manners:

qualifications

Qualifications are the formal outcome of an assessment and validation process which is obtained when a competent body determines that an individual has achieved learning outcomes to given standards. Qualifications displayed in ESCO come from databases of national qualifications that are owned and managed by the European Member States. Member States provide this information to ESCO on a voluntary basis. It therefore depends on each Member State to ensure information on its qualifications in ESCO is available, complete, correct and up-to-date. The Commission also envisages integrating private, international and sectorial qualifications from other sources into ESCO in the near future. It is piloting this
